### UNRIVALED CALVING EASE & GROWTH!

Proven progeny data identifies 5S as a true industry standout. 5S is unrivaled for his BW EPD to YW EPD spread. No other proven bull competes with this combination of sure fire calving ease, industry leading growth complimented by a top 15% MARB EPD and top 20% RE EPD. 5S is regarded as the "NEW" In Focus, improving the lineage with a better EPD spread and better carcass. The first 5S progeny ultrasound scanned for carcass merit confirmed his superior strength for both MARB and REA EPDs. 5S is backed by an outstanding cow family, descending from the same cow that produced the long-time favorite for Alta Genetics, Stevenson Fortune 425C as well as Stevenson Traveler 425B. His third dam is sired by the pureblood New Zealand sire Puketutu Robin, significant as an outcross, but more so as a foot and structure improver.

## Claresholm Veterinary Services Ltd.

Box 2350, Claresholm, AB T0L 0T0 (403) 625-3677

C. FANCY, DVM • R. CHISHOLM, DVM  
K. WRIGHT, DVM • K. MINISH, DVM

Claresholm Veterinary Services Ltd. has been providing veterinary service and consultation to Cudlobe Farms for over 20 years. The majority of the service provided consists of breeding soundness evaluations of the bulls and pregnancy testing in the cow herd. Health problems are minimized with a good vaccination program and excellent management. Heifer and bull calves are vaccinated in the spring with Bovashield FP 5, One Shot and Ultrabac 7/Somubac and at weaning with Bovashield Gold FP 5, One Shot and Ultrabac 7/Somubac (the comprehensive Pfizer Gold Program to protect against pneumonia and BVD). The cow herd receives a scour-prevention vaccine (Jencine ERC) six weeks prior to calving as well as a vaccine designed to protect against pneumonia in their calves (Cattlemaster 4). The herd has consistently tested negative in the past for Bovine Leucosis and Johne's Disease. We are proud to be associated with the Bolduc's and their cattle operation!

## WINDY RIDGE ULTRASOUND

Rod Wendorff, UGC Certified  
Box 1023 Raymond, AB T0K 2S0  
(403) 330-3000

It has been lots of fun working with the Bolduc's over the past 10 years. Even before ultrasound, they were selecting proven carcass bulls from the AAA Carcass program. Once ultrasound was recognized as another accurate way to collect carcass data, Dyce and David have been strong supporters of collecting carcass data on every one of their bulls and females when they reach one year of age. Now if you look into the breed EPD's under carcass quality (%IMF) you will see the results of all of these years of selecting top quality carcass data. Cudlobe Angus will have not only the No#1 carcass bull registered in Canada but many in the top of the breed. If you want to increase the marbling in your herd consider a Cudlobe Bull.

*If you want cattle  
that you can take to the market,  
whether you finish 'em  
or sell 'em as calves*

*49 of the top 100 IMF EPD cattle  
& 6 of the Top 10 Ribeye EPD cattle  
in Canada are Cudlobe bred.*

We have been buying Cudlobe Farms Black Angus bulls for 20 years or more. We think they have a program second to none. We fed out all our steers and the heifers calves we didn't save for breeding this year. They sold in various lots that graded 60 to 94% AAA's. The lot that graded 94% were a lot of 67 steers whose average dressed weight was 864 lbs. We were paid a premium of \$.25 to \$.75 a pound. They yielded 59.5% to 61.5% red meat.

The close out sheet on a pen of 170 steers showed, they were on feed for 108 days, they gained 4.09 lbs a day, ate 23.37 lbs a day and had a feed conversion of 5.72.  
Good program, good people to deal with.  
Thank you David, Dyce and families.

Giles Ranch,  
Brooks, AB

*Giles were paid a premium of \$162 per head on their  
Cudlobe sired heifers over other heifers in the same pen.*
