130Y is our only Ribeye sired bull this year and he is a good one. 130Y is smooth polled, long bodied, deep sided, with plenty of muscle through his quarter and over his top. The mother to 130Y is a top producer in our herd stemming from the powerful 101D donor cow. 130Y carries the performance from his sire and the moderate birth and top maternal traits of his dam. The Ribeye sired bulls were very well received in the sale last year and 130Y will not disappoint this year.

143Y is our youngest bull in our offering this year but we feel he has the overall quality to run with the big boys. 143Y was part of our show team last summer and fall at the side of his dam 18U. This pair garnered a lot of attention last fall at Farm Fair. 18U was the only mature fullblood female in the Simmental barn last fall and was admired by many for her balance and structure and awesome udder quality. 143Y will not be the biggest bull in the barn, but has lots to offer the industry and will fit into many programs that turn their bulls out later in the year. 143Y offers the

performance of his sire and then on the bottom side of his pedigree is backed by Metro and our home raised Sharp Shooter bull who left us a set of daughters that are fault free, awesome momma cows.

CHAD & STACEY MEUNIER

# CRM Simmentals

Welcome to the 12th annual On Target Bull Sale. It is our pleasure to be able to work with the group again this year and offer a set of bulls that we are proud of.

We want to extend a huge thank you to Don and Donna Meunier. We have just recently purchased their share of the purebred cow herd and we are excited about this move. Don and Donna were instrumental in bringing Simmental cows to the farm and getting Chad started in the purebred business so many years ago. Lately they have given us free rein to manage their cow herd as we saw fit and we really appreciate that trust. So while this is the last year you will be able to buy a DDM bull, the genetics will remain with us and we look forward to carrying on the tradition of raising quality animals. Thank you again Uncle Don and Aunt Donna!

Our herd has evolved with an emphasis on low management and our cows have to work to stay. We raise bulls that we use ourselves in our commercial program so we have confidence that these bulls will work for you as well.

Thank you to everyone who has supported us in the past and we look forward to talking with many of you in the weeks to come.

*Chad & Stacey Meunier*

Timberquest was bought as a mature bull from Timber Meadow Simmentals in 2009. The bull worked very well there for Robert consistently stamping out calves with thickness and shape. Timberquest has done an equally good job here as you will see in his calves I have on offer. He is a homozygous polled bull, deep red in colour with power to burn.

## LFE BIG DEAL 350R

RED POLLED PUREBRED

LFE 350R 641728 JANUARY 7 2005

If I only new how well this bull was going to breed for us when I purchased him. Big Deal was a very lucky find. I fell in love with this bull for his muscle shape, moderate frame, and square hip. Homozygous polled and quiet in nature, he has replaced my Red Vintage bull very nicely. Unfortunately he sired mainly heifer calves the last two years for bull selling terms, however I'm very grateful for all the heifers I'm able to place in the herd. His daughters have proven to be everything I had hoped and more. He is also the most reliable and athletic bull on the farm maintaining his condition while servicing large groups of cows twice a year.

## HOOKS SHEAR FORCE 38K

BLACK POLLED PUREBRED

FGN 38K 684162 FEBRUARY 19 2000

-	-	-	-	-	-	-

The second Powerline son in the offering. Powerline has worked well to sire the type of progeny we are looking for. His mother is a full sib to three different bulls I have sold in the past that have worked well for their owners. The 240 cow is one of the foundation black cows in our herd. Having both her and Powerline in his pedigree should compliment this bull well into the future.

This is the first year I had progeny from the Timberquest bull out of a sizeable amount of Big Deal daughters. The two bulls complement each other extremely well which is most notable in the heifer pen, but the bulls are pretty good too. 344 isn't the biggest bull in the pen, but he could be the most complete. Structurally sound and easy to like.

Heifer Bull. The industry is looking good and with more heifers to be bred in the next couple of years, this Timberquest and Big Deal combo will serve his new owner well. Backed with maternal strength and two outstanding sires.

This bull will make many friends sale day. He has the most rib shape and depth of any bull in pen. A very good natured bull with a handsome blaze face to make him a little special. I have said a lot about cow families in writing about these bulls, but some cows just make them better than others. 257 mother always has a calf with that little extra style.

The more I look at the 334 bull, the more I like him. Deep red, thick and meaty. He is out of a very complete Big Deal daughter who has a bright future ahead of her. A bull that could either be used to sire big soggy steer calves, or pear shaped soggy heifer calves that turn into productive mothers.

A very special bull in this years offering. 362's sire was purchased in the 2010 sale by Murray Holt. He was a black Shearforce son that had many friends and was our high seller in the sale that year. I bought an interest back and used him for clean up in our heifer pen. The bull has worked very well in siring the type of progeny both Murray and I like. He's a bull I should use more of in the future as 362 shows. 362 is a very complete bull with the moderate frame and thickness I like to produce. The only bull sired this way in the sale. Don't pass him up.

## This image shows a single page of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page, leaving small margins at the top and bottom. There is no handwriting or other markings on the paper.
